

UNIVERSITY
of
GREENWICH

University of Greenwich Sustainability Policy

The University of Greenwich has over 25,000 students and over 1,500 staff based across three campuses: Avery Hill and Greenwich in London and Medway in Kent. In recent years it has made significant progress improving its sustainability performance and is now recognised, from the awards it has won, as one of the UK's sector leaders.

As a University we have a role in making further improvements in our own academic and operational spheres of influence. We should also enable our students to have skills and knowledge to make positive sustainable change. In order to achieve this the University will ensure that sustainability is applied as the driver that delivers our wider strategic goals, whilst enabling societies to flourish and to protect the natural systems upon which the institution ultimately depends.

Our decisions and actions will work to deliver sustainable outcomes. As a result the University is committed to:

- Maintain or exceed compliance with all relevant UK legislation and regulations, and appropriate internal and external requirements. We will retain our ISO 14001 accreditation and achieve its objectives and targets.
- Review all of our activities and operations, in order to identify, understand and evaluate all the direct and indirect environmental aspects and impacts. We will then prioritise action to address them.
- Ensure continuous improvement by establishing procedures and associated sustainability performance targets that are reviewed and externally reported annually.
- Reduce resource use and prevent pollution by reducing and eliminating sources of pollution and developing appropriate control mechanisms.
- Ensure that sustainable development is fully understood by staff and students and is enshrined within all aspects of strategy, planning and activities with resources available to enable such.

In order to implement this policy, the University has undertaken a baseline review and has determined the following set of key sustainability impacts and associated objectives:

- **Education and Research for Sustainable Development:** Actively encourage and support the teaching of and research into sustainable development in the University.
- **Energy and carbon:** Reduce energy use and to further explore the possibilities of less carbon intensive energy sources, either through the direct purchase of renewable energy or through an increased use of onsite renewables.
- **Waste and natural resources:** Prevent pollution by reducing harmful emissions and discharges and to promote the 'zero waste' principle (rethink, reduce, reuse, recycle) in order to minimise the environmental impact of the use of natural resources and waste disposal.

- **Procurement:** Implement the University's Sustainable Procurement Policy that supports the purchase of more sustainable products and services from responsible contractors and suppliers.
- **Food:** Work with catering contractors to ensure our Sustainable Food Policy is met and the University's Fairtrade accreditation is maintained.
- **Water:** Reduce water use and establish a utilities monitoring and targeting system.
- **Transport:** Minimise harmful emissions arising from business travel, commuting and deliveries by implementing the University-wide Green Travel Plan.
- **Construction and Refurbishment:** Incorporate the principles of sustainable development into all new build and refurbishment projects and integrate climate mitigation and adaptation measures where appropriate and feasible.
- **Cultural and Natural Heritage:** Protect and conserve the heritage buildings occupied by the University and implement our Biodiversity Policy that actively protects and enhances wildlife on campus.
- **Community Involvement:** Build partnerships and take part in networks to share experience and knowledge of sustainability with the affiliated Student Unions and broader community and lead the debate on sustainability issues.
- **Staff and Student Wellbeing:** Use sustainable development activities to provide opportunities for positive stakeholder engagement.
- **Training, Awareness and Communication:** Increase the awareness and understanding of sustainable development and its practical application amongst all staff and students, through learning opportunities and training.

The University of Greenwich Sustainability Policy is fully supported by the Vice-Chancellor's Group and the Sustainability Management Board who have ultimate responsibility for setting and reviewing sustainability objectives and targets of the University. All staff, students, visitors, contractors and relevant external stakeholders share this responsibility. This policy is reviewed annually by the Vice-Chancellor.

Professor David Maguire, Vice Chancellor, University of Greenwich
