

Local London and Greener Greenwich,
October 2022

About Local London

Influencing

- A voice for the sub-region
- Levelling Up, local economic development, devolved funding.

Building capacity

- We act in a fundraising and income-generation capacity for the boroughs of the partnership. This means bidding for grants and other financial resources for specific purposes where it is appropriate and agreed.
- Delivering externally-funded programmes across the sub-region and in boroughs

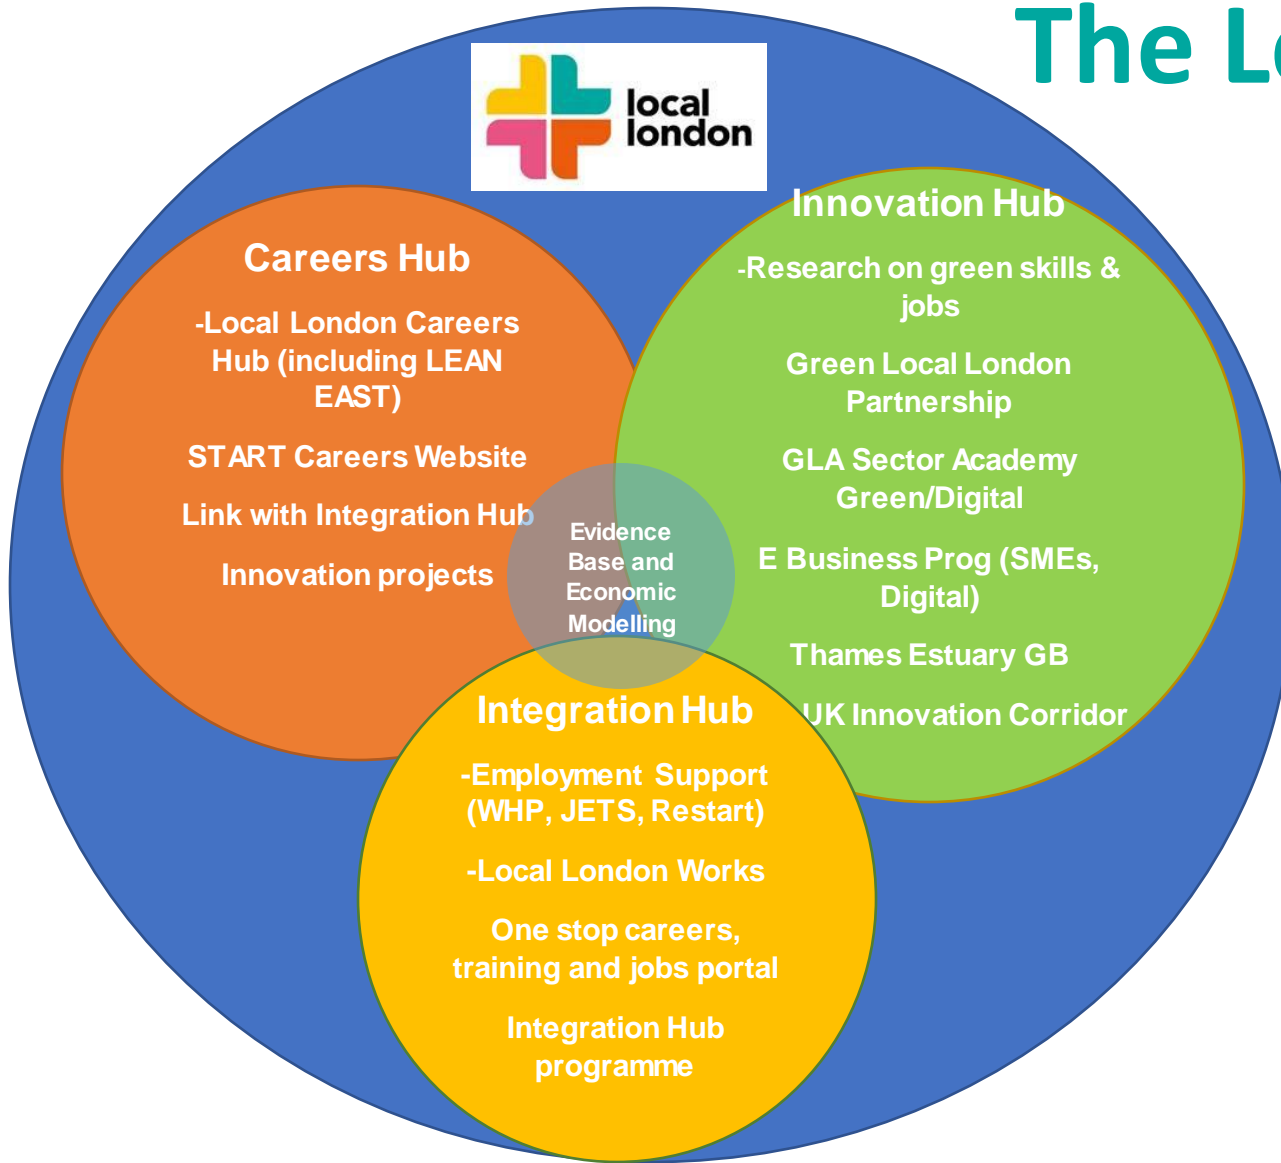

Focus

- careers, employment and skills
- digital infrastructure and digital inclusion
- economic recovery and green growth

globally connected, locally focussed.

The Local London Hub Model

To make sense of the increasing complexity

To ensure joined up thinking between our programmes

Evidence and data at the centre, and contributing to the work of all the hubs

Stronger focus on sectors, especially Green

Bringing together;

- Employers, Local authorities, Education & Training providers, the GLA and other key stakeholders
- The economic corridors and London Enterprise Zone
- The Mayor of London's Green & Digital Sector Academy and Institutes of Technology
- The London Retrofit Plan jobs and skills requirements
- Links to national and regional green policy, funding and developments

Designed to;

- Create employer awareness and demand
- Create confidence in the market and sectors
- Identify jobs and skills needs in key green economic growth sectors
- Be ambitious
- Be innovative and creative...

.....and ultimately – deliver together for our sub-region

Green Jobs and Skills Research (2022)

A pan-London summary and four sub-regional reports commissioned by the four sub-regional partnerships.

Undertaken by the Institute of Employment Studies and WPI Economics

To:

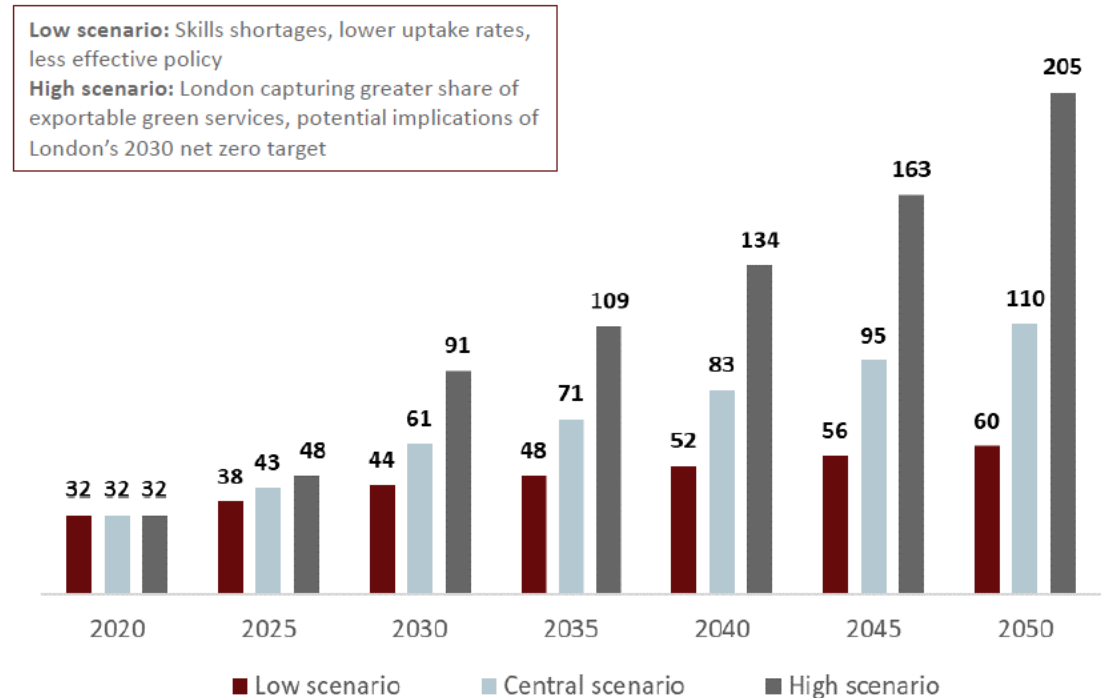

- Develop an agreed definition of green jobs
- Understand current and future need and opportunity by sector and location
- Understand the number of potential jobs and the skills needs of employers
- Understand the timeline for demand
- Use the research to stimulate planning and collaboration so that employers can access a skilled workforce
- Stimulate economic growth
- Support the GLA Green New Deal Mission

Local London Green Jobs and Skills Research, February 2022

Projections of green jobs in Local London

The total number of jobs in the central scenario is projected to rise from 32,000 in 2020 to 110,000 in 2050, representing an above-3-fold increase. Within this scenario, three sectors account for almost 8 in 10 (77.6%) of Local London's total number of green jobs by 2050:

- Power (41,800), representing 38% of total green jobs.
- Homes and Buildings (27,400), representing 24.9% of total green jobs.
- Low Carbon Transport (16,100), representing 14.6% of total green jobs.

Local London Secured Strategic Projects

- **Local London Green and Digital Mayoral Academy - £237k**
 - A sub-regional project which will collaborate across 11 further education providers, 9 London boroughs and 30+ employers in the Local London region to ensure the GLA has a central delivery mechanism to improve its Green and Digital offer.
- **Local London Green Academies Partnership - £2.46m**
 - A sub-regional project which aims to increase inward investment across the Local London region. Through an intensive capital and revenue investment model we will see 13 further education providers collaborate to improve the regions Green skills offer.

Total investment secured - £2.7m.

Local London Green and Digital Advisory Board Sector Focus...

The LLGDAB supports the following areas.....

1. Photovoltaics
2. Internal/external insulation technologies
3. Ground/air source heat pumps

London School's Climate Kick Start Event

- Promoting Careers in Green Skills to over 1,000 Year 9 students from schools with the higher percentage of young people on Free School Meals.
- Employers, from a range of sectors including transport, construction, highways, digital etc., will be involved in the Interactive Stands and Workshops on Careers in Green Skills.
- Students will also be offered tours of the building that will be linked to the construction of the building.
- Thursday 10th November – London Stadium and home of West Ham United Football Club.

How it started and how it's going.

When he started out in 2018, our founder Hamish designed an on-site delivery system, which was built using off the shelf components. He was able to fill our customers' containers by the roadside from large tanks on board the van!

We've made a few changes to the way we do things since then as our product range has grown, but the principle has remained the same - innovating to find efficient ways to eliminate single use plastic and make supply chains more sustainable.

Our work has resulted in an estimated **800,000** single use bottles saved, and that number is rising fast!
