Showcasing our University of Greenwich Community

## Meet Dr. Lianfeng Quan and Dr. Vicky Lee: Pioneering Sustainability in MSc Finance Programmes

### ABOUT

Dr. Lianfeng Quan and Dr. Vicky Lee of the School of Accounting, Finance, and Economics at Greenwich Business School are spearheading the integration of sustainability into a shared core MSc module, Principles of Finance (PoF). This initiative spans seven MSc programmes, ensuring a comprehensive and unified approach to sustainability education.

### WORK

The shared PoF module covers an array of sustainability topics, including ESG (Environmental, Social, and Governance), climate risk, Sustainable Development Goals (SDGs), corporate and financial institution sustainability, private-sector frameworks, and sustainable finance trends. Dr. Quan and Dr. Lee leverage their expertise to deliver these critical sustainability teachings.

The profound integration of sustainability has earned the pertinent programme the prestigious Sustainability and Climate Risk (SCR) accreditation from the Global Association of Risk Professionals (GARP). This recognition positions the MSc programmes as leaders in environmental and social responsibility, showcasing their commitment to sustainability education.

The inclusion of sustainability enhances the overall learning experience for MSc students. It prepares them for contemporary challenges, engages them with real-world issues like climate change and ESG, and enables practical application of theoretical knowledge. Students equipped with sustainability knowledge and skills are better prepared for a job market that increasingly values professionals contributing to sustainable practices.

“**The knowledge gained has not only enriched my academic experience but has also equipped me with a practical and forward-thinking mindset that I believe will be invaluable in my future career endeavors.**
