Research spotlight: Dr Asma Buanz on revolutionising contraception design	Dr Asma Buanz's research could lead to medical devices that are personalised to individual women's health. In this video, Asma demonstrates the 3D printing of intrauterine devices (IUDs). You'll explore the ways that these devices can be tailored, including to deliver a specific dose of contraceptive drug required by a patient. You'll also learn about other 3D-printed drug-delivery devices, such as micro needles that are so small they can puncture the skin without causing pain. Asma is a senior lecturer in pharmaceutical sciences at the School of Science, part of the University of Greenwich's Faculty of Engineering and Science. She was interviewed for this video by broadcaster, engineer and STEM advocate Dr Shini Somara. Read about our research at gre.ac.uk/research .

Title	Information
Research spotlight: Professor Joshua Boateng on novel drug delivery technologies	The University of Greenwich is making big strides into research within alternative administration routes for drug delivery, including vaginal drug delivery. Professor Joshua Boateng and his PhD student Ahmed Alzainy talk about some of this research, its implications, and how students can get involved.
Research spotlight: Science research on the Medway Campus	Get a glimpse into the world-leading research in science taking place on the Medway Campus of the University of Greenwich right now.
